## ACCESS Telex System (PC-based)

- Add-on card with one telex line and one user license (stand-alone version)
- Includes AIMS Telex Manager Application software that supports Win95/98/Win2000/WinXPP
- Connector for Telex line, serial or parallel printer
- Single, low-level current design
- TAS Approval – Model 10 (ACCESS Telex Interface Card)

### HOW IT WORKS

- ACCESS Telex Interface Card can be setup in several ways according to user specified operation requirement.
- It can connect to a computer as a dedicated telex system, to prepare, send and receive telex messages.
- It can connect to any computer configure to run concurrently as telex system while using the computer for normal computing purpose.
- It can be upgraded for multi-users environment, from workgroup to client-server environment, both in Novell and Windows network environment.

### BENEFITS

- Comprehensive, well proven and robust telex communication system.
- PC-based add-on card (ISA interface) or external unit design options
- Easy to operate, user-friendly interface design.
- Built-in editor for telex preparation, send, receive and on-line communicator.
- Stored more than 10,000 pages of A4 size telex messages
- Built-in telex phonebook for quick access and storing of telex database.
- Allow automatic resend of failed, unsuccessful telex transmission
- Integrated file management system for quick retrieval, query, archival of incoming & outgoing telex messages.
- Economical and affordable as compare to tele-typewriter version
- Eliminate queuing for telex processing with multi-users setup.
- Reduced running cost with industry standard telex communication device and printer setup.
- Maintenance trouble-free with replacement unit on standby.
- System upgrading protection from single user to multi-users environment.

## SPECIFICATIONS

### Standard Software:

AIMS Telex Communication (ATComm)  
AIMS Telex Manager (ACMan)

### Optional Software:

AIMS Courier Communication (ACComm)  
AIMS Telex Chat (ATChat)  
AIMS Telex Notification (ATNotif)

### ACCESS Telex Box Hardware:

ACCESS Telex Interface Card (TAS Approval)

Telex modem Add-on card unit  
Data format Baudot  
Operation 2 or 4 wires, half-duplex  
Line Interface Current switching interface  
4 wires polar  
80V double current  
2 wires passive neutral strap selected  
Single current  
Type A & B

Modem interface Complies with CCITT V21, R20 or Bell 103

Line speed 50 or 300 baudrate  
Communication Lease or dial-up network  
Printer interface EIA RS232C for online  
Connector 2 wires pin connector

Power supply Single-phase, 187-254V AC  
Frequency 47 ~ 63Hz  
Environmental 25 ~ 35°C  
Relative Humidity 25 ~ 75% non-condensing

Dimension 245(W) x 310(D) x 75(H)

### Optional Attachments

Dot matrix printer with Telex roll stand  
LaserJet printer  
Computer, Server

Available

## CLIENTS SUPPORT

Win95/98, WinNT, WinXPP interface

## SYSTEM REQUIREMENT

IBM or compatible PC

For dedicate: Pentium4 CPU or above,  
512MB RAM  
40GB HDD  
WinXPP

For server: Dual Core or Xeon CPU  
1GB RAM  
160GB HDD  
Windows Server 2003 or MS  
Small Business Server

## FEATURES

### User Rights

- User rights can be configured on individual or group basis for Send, Receive & Journal.
- Setting of users or group priority and security access rights.
- Administrator rights for setting users, maintenance and database access, etc.,
- Centralised phone book.
- Use of public phone book for sharing common telex destination, new entries, edit or update.
- Data can be export/import in ASCII, text or database format.

### Audit Trail

- Comprehensive audit trail of telex correspondences includes data, time, duration, sender detail and recipient detail, send status, error code and telex line numbering.

### Flexible & Expandable

- Identical for all telex add-on card for stand-alone & multi-users system setup.
- Support up to 8 telex lines per server.
- Multi-users licensing with 5 users license add-on, up to 1000 users.
- AIMS Enterprise version available.
- Option to connect to fax gateway.
- Option to connect to other messaging service providers.
